LAB 5 | DATA FLOW DIAGRAM

Context-level view: external actors and services exchanging data with the Digital Health Management System.

LAB 5 | LEVEL 1 DFD - CORE HEALTHCARE WORKFLOWS

Decomposition of patient records, appointments, clinical documentation, prescriptions, and laboratory reporting.

LAB 5 | LEVEL 1 DFD - SUPPORTING & GOVERNANCE PROCESSES

Authentication, notifications, follow-up, administration, and audit data flows.

AUDIT COVERAGE

D7 receives events for authentication, patient-record access, clinical changes, report access, role changes, and administrative configuration. Sensitive data access remains permission-controlled. P3 appointment events, P4 care-plan / prescription events, and P5 report events can trigger P6. Administrator-approved role and permission changes update D1 (User & Role Data).

External entity / process group | Process | Data store | External service

External identity and notification interfaces are optional deployment integrations.
